### WORK FXPFRIFNCE

01/02/2019 - 24/10/2022 Naples, Italy

# **Software developer** Ericsson IT Solution & Services

# EMA to EDA migration for the Spanish provider Yoigo and integration testing.

Support provided in these activities:

- Integration testing for Yoigo;
- Installation and rollback activities;
- Subscriber View handling (installation, tests, rollback procedures);
- Decommissioning handling;
- · License installation:
- Network Element decommissioning.

#### vEDA installation in Openstack environment for the **English provider Inmarsat.**

- vEDA basic functionalities test object list;
- E2E test object list:
- · Linux OS administration:
- vEDA installation:
- Network element integration:
- · Networking knowledge.

### Wind3 ECOM - Migration to MS Azure

Legacy JavaEE application migrated to MS Azure Cloud (WebApp and Database). The basic authentication method was replaced by Azure Active Directory integration to improve and simplify the authentication process.

- · Database migration and administration;
- SVN to Git migration;
- Initiation of DevOps process;
- · Azure Active Directory integration;
- Docker container and Docker images management;
- JBoss to Wildfly migration;
- Bash script to execute operations in batch;

#### Other skills improved during this working period:

- · Openstack environment installation and configuration;
- · Docker containers;
- Ansible and bash scripting for EMA/EDA testing automations;
- MySQL database administration;
- · Orchestration rolling training ongoing;
- Training ONAP e OPNFV;
- DevOps.

#### Wind3 Ericsson Orchestrator stream

- VNF deploy using Ericsson Orchestrator;
- · VNF scaling and healing;
- Automated tests using Robot Framework/Selenium;
- Automation tools design and development;
- · Agile process;
- CI/CD promoter and designer;
- · Pipeline setup and management;
- Python (Flask) development;
- Angular development;
- Full stack managed using Docker containers (production level);
- · Basic API caching;
- IWT authentication method.

# **24/10/2022 - CURRENT** Turin, Italy

### **RELEASE MANAGER / CI DEVELOPER** Luxoft

Agile methodology heavily applied during this job experience.

#### **Release Manager**

- Integrate new feature/bug fixes based on scheduled plan in order to release a new test version
- Daily interaction with POs/developers (different teams in general) to help or define integration schedule
- Partecipate to integration planning meetings and understand how to manage different kind of integration
- Address bug tickets for newly integrated feature
- · Heavy usage of Jenkins, Github, Gerrit

#### CI Developer

- Develop Ansible playbooks
- Maintain and fix CI jobs according to new changes in the codebase
- · Manage and develop Zuul jobs
- Python scripting
- Bash scripting

# **FDUCATION AND TRAINING**

15/09/2011 - 20/07/2016 Sant'Agata De' Goti, Italy

"Amministrazione, Finanza e Marketing – Sistemi Informativi Aziendali" Istituto di Istruzione Superiore "de' Liguori"

**15/09/2016 - CURRENT** Salerno, Italy

• Computer Science University of Salerno

01/02/2019 - 10/02/2019

Openstack

Configuration and installation of Openstack environment

20/06/2020 - CURRENT San Francisco, United States

**ONAP** Linux Foundation

Abandoned training

20/06/2020 - CURRENT San Francisco, United States

**OPNFV** Linux Fundation

Not certified

# LANGUAGE SKILLS

MOTHER TONGUE(S): Italiano

Other language(s):

#### Other skills

### Other skills

Raspberry, 3D Printing, Photography, Photo and video editing.

#### Also known

## Also known

Eclipse, Atom, VSCode, IntelliJ, Netbeans, HTML, CSS3, Bootstrap, jQuery, Ajax, Basics of PHP, JavaScript, Azure AAD, SpringBoot, WebSocket, Java EE, C, Basics of Python, Java, Git, Maven, Jenkins, Basics of DevOps, Gitlab CI/CD, Github, Google Cloud, AWS, Azure Cloud, Openstack, Docker.

### Software analyst and full stack developer

# Software analyst and full stack developer

Creating the structure of a restaurant software management according to the engineering approach. Main feature:

- Team working;
- Analysis, design, testing and maintenance of a software;
- UML:
- · Verification and validation of processes;
- MVC Pattern;
- Three tier system;
- Ubuntu Server 18.04 setup;
- DNS managment;
- · Home made hosting server;
- · JavaEE, JS, JQuery development;
- MySQL;
- HTML, CSS and Bootstrap;
- · Junit and Selenium testing;
- Jenkins for continuous integration;
- · Maven;
- Git;
- AWS and GoogleCloud.

# Software analyst and developer

### Software analyst and developer

Small e-commerce website deployed with Java EE using the MVC pattern linked to MySQL as a DB to store persistent data.

Main feature I worked on:

- Deploy Servlet as controller;
- Deploy JavaBean as model;
- Deploy ISP as view;
- Use of HTML5, CSS3, Bootstrap, JavaScript for the front-end;

- Use of Ajax and JQuery for the async interaction;
- · Database structure;
- Database interaction with the server;
- phpMyAdmin for the database usage;
- Auth system using session and cookies.

**Certifications** 

Startup Weekend Caserta powered by Google for Entrepreneurs (2018)

# Full stack developer

Full stack developer

During Covid-19 lockdown I had the idea to develop a real-time game based on SpringBoot and WebSockets to play Taboo game with my friend as we used to do. I bought a Google Cloud VM and setup the environment with Tomcat and MySQL as database. Frontend technologies are HTML, jQuery, Ajax, Javascript and Bulma framework. (We played that game and we still play it).

I authorize the processing of personal data contained in my curriculum vitae pursuant to article 13 of Legislative Decree 196/2003 and article 13 of EU Regulation 2016/679 for the protection of natural and legal persons regarding the processing of personal data.
