TL;DR

If You Read One Section, Make It This

I'm a DevOps engineer and Scrum Master with a genuine passion for technology, continuous learning, and open source - in IT and beyond. Outside of work, I maintain a production-grade homelab running a self-managed Kubernetes cluster (Talos Linux, 3 VMs) with public-facing services, centralized SSO/IdM, GitOps via Flux CD, and sealed secret management - applying the same engineering rigour I bring to production environments. I try to contribute to open-source projects I rely on daily, build small tools to solve real problems, and help local businesses establish a digital presence. When AFK, you'll find me shooting film, travelling, or making (lot of) pizzas.

WORK EXPERIENCE

24/10/2022 - CURRENT - TURIN, ITALY

DEVOPS ENGINEER (TECH LEAD) / SCRUM MASTERLUXOFT (DXC)

In my latest role at Luxoft, I have been working as Scrum Master and Tech Lead within the DevOps team. I am responsible for leading the team through Agile practices, coordinating technical priorities, and supporting both delivery and team growth. While managing the team's workflow and ceremonies, I remain actively involved in day-to-day operations, ensuring smooth collaboration and continuous improvement across all processes. From a technical perspective, I focus on maintaining and evolving CI/CD pipelines managed with Zuul, automating tasks and integrations using Python scripting, and handling configuration management and deployments with Ansible. I also have some experience using Bazel for build automation in specific scenarios.

01/02/2019 - 24/10/2022 - NAPLES, ITALY

SOFTWARE DEVELOPERERICSSON IT SOLUTION & SERVICES

Worked across multiple international projects as Integration Engineer and Software Developer, supporting telco providers including Wind3 (Italy), Yoigo (Spain), and Inmarsat (UK). Key activities included legacy Java EE to Azure migration (SVN to Git, JBoss to Wildfly, Azure AD, Docker), EMA to EDA migration with full rollout in live environments, vEDA installation on OpenStack, and end-to-end CI/CD pipeline design. Built a Python/Flask + Angular automation platform for Wind3, fully containerized and delivered via pipeline. Developed internal tools for test and installation automation with Ansible and Java - both adopted by Ericsson and customers. Left one month before a planned promotion to Solution Architect.

CURRENT

SELF-DRIVEN PROJECTS

Passionate about technology and open source, I maintain a production-grade homelab (Kubernetes on Talos, Flux CD, centralized SSO, sealed secrets) while trying to contributing to the projects I rely on daily - complemented by freelance web work for local businesses and a constant drive to learn, in IT and beyond.

PS: Even if this is not a certified employer, I strongly think that self learning in this field the key, so that's the reason behind this section.

EDUCATION & TRAINING

15/09/2011 - 20/07/2016 - SANT'AGATA DE' GOTI, ITALY

"AMMINISTRAZIONE, FINANZA E MARKETING – SISTEMI INFORMATIVI AZIENDALI"- ISTITUTO DI ISTRUZIONE SUPERIORE "DE' LIGUORI"

15/09/2016 - SALERNO, ITALY

COMPUTER SCIENCE- UNIVERSITY OF SALERNO

I left once I started working full time

LANGUAGE SKILLS

Mother tongue(s): **ITALIANO**

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B2	B2	B2	B2	B2

TECH STACK

Technologies I've worked with during the years

- **Languages & Frameworks:** Python, Angular, JavaScript, HTML5, CSS3, Bootstrap Java (Java EE, Spring Boot), jQuery, Ajax, C.
- **Cloud & Infrastructure:** Google Cloud (personal projects), AWS (personal projects + some work related training), Azure Cloud (including Azure Active Directory), OpenStack, Docker, K8S.
- **DevOps & CI/CD:** Git, Jenkins, GitLab CI/CD, GitHub Actions, Zuul.
- **Development Tools:** VS Code, IntelliJ IDEA, Eclipse.
- **Other Skills:** MVC pattern, REST API development, basic networking, cloud deployment strategies.

COMMUNICATION AND INTERPERSONAL SKILLS

Communication and interpersonal skills

Excellent communication skills developed through professional experience as Tech Lead and Scrum Master, facilitating agile ceremonies, supporting stakeholder engagement, and promoting clear, constructive dialogue within cross-functional teams. I regularly manage group dynamics, adapt communication styles to different contexts, and foster a collaborative environment - skills essential for conflict resolution, mentoring, and continuous team improvement.

ORGANISATIONAL SKILLS

Organisational skills

Organizational and coordination skills built across professional, academic, and consulting experience - refined daily as Tech Lead and Scrum Master.
